

December 2020 Update

LOADING THE UPDATE ON A UNIX OR LINUX SERVER

Note: Updates must be loaded in consecutive date order. Do not load this Update if your system is not current through Ver.10.3.6 The current version number on the Main Deneb Menu, after loading this update will display Ver. 10.3.7

Always make sure that all Users have logged out of Deneb, while the update is being loaded.

INSTALL INSTRUCTIONS: [Working on a Windows PC]

1. Go to the Deneb Website at <http://www.denebsoftware.com> .
2. Click on the new TAB "Tax Tables & Year End" to open the screen.
3. Under the "Programs to Download" section, click on the 2020 Year End Update Programs. Select the correct Download for your Operating System. If the "Download" prompts you to select a location for it, you may download into a location of your choice, or by default it may auto download into the "Downloads" folder on your system. After downloading, the 'tar' file and 'Deneb_YE_Update_2020_Install.bat' file must be transferred to your Server (and placed in your Deneb Directory (folder). If you need assistance with this, please call Deneb Support or your IT Tech.

You can either open to view, or print the 2020 Year-End Listing of Programs.

4. In your Deneb Directory, on your Server, "Run" the file named "Deneb_YE_Update_2020_Install.bat" to run the Installation Program.
5. Verify that the Deneb Main Menu is now showing Ver. 10.3.7. If so, you have successfully completed the Update.
